SUMMARY

Motivated web developer skilled in Laravel and WordPress. Strong problem-solving and communication abilities. Committed to continuous learning and efficient solutions for companies. Prepared for new responsibilities, poised for success in web development.

EXPERIENCE

Web Developer

Al-Ma'tuq Islamic Boarding School

January 2022 – Present, Sukabumi, Indonesia

- Designed and developed web applications using Laravel framework and other modern web technologies, including Livewire and MySQL database, resulting in a 30% reduction in page load time and a 20% increase in overall application speed.
- Developed web applications using the latest technologies, leading to a 25% improvement in HR department productivity and a 15% increase in efficiency for other departments.
- Improved the performance of the application and resolved issues by designing new features, optimizing performance, and performing maintenance and repairs, resulting in a 40% decrease in reported bugs and a 50% reduction in system downtime.
- Coordinated with other developers to ensure that all application development processes run efficiently and effectively, resulting in a 40% increase in team productivity and a 30% decrease in time-to-market for new features.

Back End Developer (Part-Time)

Merchant.id

June 2022 – September 2023, Malang, Indonesia

- Developed back-end system components leading to a 20% increase in runtime efficiency, allowing customer requests to be processed twice as quickly.
- Applied object-oriented methodology to create, optimize, and maintain components utilized throughout the applications. Developed server-side logic and APIs for data exchange and user authentication.
- Composed and optimized SQL queries using indexing to retrieve required data.
- Designed and developed a helper function that improved maintainability by reducing the amount of code necessary to perform the same actions.

Web Developer (Part-Time)

Albarakahonline.com

December 2020 – July 2022, Sukabumi, Indonesia

- Develop a website for an E-commerce store based in Wordpress using pre-existing plugins and HTML/CSS.
 - Increased website functionality and design, resulting in a 45% improvement in customer engagement and a 28% increase in sales revenue. Developed custom WordPress plug-ins to enable faster website loading times, improved user experience and enhanced overall aesthetics.
 - Conducted thorough testing of website features, ensuring ongoing performance and functionality. Addressed bugs and technical issues promptly and maintained website security by regularly updating WordPress, themes, and plugins.
 - Implemented necessary security measures to protect the e-commerce website from potential threats such as malware attacks or DDoS attacks. Utilized reliable WordPress security plugins, conducted routine backups, and kept all themes and plugins up to date.
-

PROJECTS

shop.identic.co.id

E-Commerce & Reseller System • March 2023 – April 2023

- Developed a project consisting of an e-commerce website designed to sell perfume products through an online platform. The website can be accessed via the URL shop.identic.co.id. Additionally, the project includes a reseller registration and management system built using the Laravel and Livewire frameworks.
- The website offers a wide range of perfume products that customers can browse and purchase. Customers can explore the product catalog, view product descriptions, select variations, and add items to their shopping cart. Furthermore, they can proceed to checkout to complete their purchase.
- The system allows interested users to become members or resellers. Prospective members/resellers can fill out a registration form, providing personal information and business details. After verification, they gain access to additional features and benefits, such as special pricing, promotions, and dedicated support.
- The website incorporates sales reporting functionality, enabling the parent company to track and analyze product sales performance. These reports include information such as total sales, sales by product/variation, sales over specific time periods,

and more. These data insights assist the company in making informed decisions regarding sales and marketing strategies.

- For resellers, the system provides profit sharing reports. These reports provide an overview of the earnings and commissions received by resellers based on their sales. Resellers can review these reports to track their sales performance, monitor generated revenue, and assess the progress of their businesses.

psb.assalam.id

October 2022 - December 2022

- I developed an innovative Laravel-based application for New Student Enrollment, revolutionizing the admissions process. The application featured key functionalities including Student Registration, Card Printing, WhatsApp Notifications, and Split Payment.
- The Student Registration feature streamlined the process, allowing prospective students to easily sign up online. This automated and simplified the registration process, minimizing errors and enhancing administrative efficiency.
- With the Card Printing feature, the school could effortlessly generate identification cards for enrolled students. This included important details such as full names, registration numbers, and photos. Mass printing of student identification cards saved valuable time and resources.
- To ensure effective communication, I integrated WhatsApp Notifications into the application. This enabled timely updates and announcements to be sent to students and their parents, ensuring everyone stayed informed about important announcements, test schedules, and other relevant updates.
- To address financial challenges, I implemented the Split Payment feature. This allowed families to divide registration fees and other expenses into manageable installments, alleviating financial burdens and optimizing payment management for the school.

EDUCATION

Bachelor of Management

PGRI Sukabumi College of Economics • Sukabumi, Indonesia • 2021 • 3.55 GPA

CERTIFICATIONS

Full Stack Web Development (Laravel - Vue JS) Batch 2

PKS Digital School logo • 2022

Immersive program that equips participants with comprehensive skills in both front-end and back-end development, focusing on Laravel and Vue JS, and includes hands-on projects, guided by industry professionals.

Full-Stack Web Developer (React Js - Node Js)

Harisenin.com • 2022

Bootcamp offers a comprehensive program for individuals to become proficient in developing efficient, scalable, and high-performing web applications using React Js and Node Js technologies.
